The *4th Ibero-Latin American Congress on Fire Safety (4° CILASCI)* will take place in Recife City, capital of Pernambuco state, in Brazil, from 09-11 October 2017. Promoted by ALBRASCI, this year's event is organized by professors of Federal University of Pernambuco (UFPE) and others institutions.

The *4th CILASCI* is characterized as a scientific and technical event, designed to address issues related to fire safety, promoting the integration between the various actors involved in this area of expertise. In this context, CILASCIs contribute to the sustainability of the projects, which is understood not only from the perspective of preserving the environment, but also from the point of view of preservation of life, including economic, social, cultural and political factors in an inclusive and long-term approach. The event also aim to contribute to the dissemination of knowledge, able to clarify to the society about fire safety.

Professionals, students and organizations, interested in safety against fire, and other related fields, are invited to participate and submit their technical and scientific papers to the *4th CILASCI*. The event will address topics such as:

- Fire and explosion risk management;
- Fire safety management systems;
- Legislation, regulation, standardization and certification in fire safety;
- Public policies for fire safety;
- Evacuation and human behavior in fire;
- Fires in high-rise buildings;
- Fires and explosions in tunnels;
- Fires in areas with high concentrations of people: shopping malls, stadiums, airports, etc.
- Fire and explosions in industrial plants;
- Architectural aspects for fire safety in buildings;
- Passive protection in fire safety;
- Active protection in fire safety;
- Sprinkler systems;
- Smoke and gas control systems;
- Actions and equipment for firefighting;
- Technical and forensic expertise in fire;
- Recovery of buildings after fire;
- Computational modeling of structures and materials in fire;
- Experimental analysis of materials and structures in fire;
- Forest fires;
- Teaching, research and human resources training in fire safety;

We count on your participation to the success of the 4th CILASCI, which undoubtedly will be a landmark for our state.
