The Brazilian Microwave and Optoelectronics Society (SBMO) promotes, every two years, the Internacional Microwaves and Optoelectronics Conference (IMOC) in cooperation with IEEE Microwave Theory and Techniques Society of the Institute of Electrical and Electronic Engineers (IEEE MTT-S). In the year of 2015, the conference will be held at Porto de Galinhas on the city of Ipojuca and will be coordinated with participation of the UFPE photonics group.

The IMOC 2015 will provide to the scientific community an international forum for the exchange of Microwave and Electronica R&D information. The 16th edition of the event happens from November 3rd to 6th, and the papers must be submitted until March of the same year. The participants will be able to subscribe to short courses and seminars, and also to integrate the discussions on the most recent publications on the research field.
